

CONDUCTION SERIES: REINDEER CYCLONE (Betsey Biggs, February 2025)

SCARY PREDATOR SOUNDS

COME FROM

ALL AROUND

THE OUTSIDE

Notes: Each participant should choose a role ahead of time.

- children (3-5 sounds)
- elders (2-4 sounds)
- strong fast reindeer (10-12 sounds at least)
- predators (2-3 sounds)

Other than predators, sounds do not come in, or drop out during the piece

All sounds should begin at a random neutral position, ie not in a 'circle'

Start with this random scene, then first loud predator sound spurs reindeer into action

When first predator sound is heard, all reindeer move into counterclockwise movement

- children and elders into the middle, slower, weaker
- strong fast reindeer faster, stronger

This movement continues until predator moves away. This may happen more than once.
